

Sentry BevCon

A Sales-Division of International Carbonic Inc.

Now you can hold 8 flavors plus water & soda in the palm of your hand with the **NEW JS-8**
JUICE - SODA - WINE VALVE

The JS-8 is a highly versatile instrument, electronically engineered and programmable for beverage delivery of carbonated drinks, non-carbonated drinks and wine. It's compatible with modern day control systems to ensure portion control, accountability and greater profits.

Carefully constructed from strong, highly durable, FDA approved ABS Cylolac plastic, the JS-8 resists erosion from acids found in juice products. In normal use it is virtually indestructible and the operating handle weighs only 8 ounces.
